

IMPORTANT HEALTH INFORMATION

Re: Measles, Chicken Pox and Shingles

Please may we ask for your co-operation in this important matter.

It is important to safeguard the wellbeing of any child who is receiving treatment for Cancer/Leukaemia. Such children are at risk from Measles, Chicken Pox and Shingles. If they come in to contact with anyone suffering from these conditions the pupil requires to be given some protection against them. Unfortunately this has to be given within 72 hours of the contact.

We would ask therefore that if your child develops Measles, Chicken Pox or Shingles that you inform us **immediately** so that appropriate action may be taken.

Your child is not at any risk from this situation, however, the health of such pupils does depend on your co-operation in this important matter.
